

SD-WAN Solution

Powered by VMware

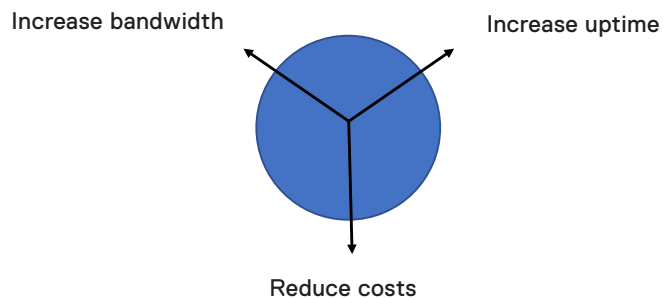

Updated January 2020

Customer benefits

- **Prioritize critical applications** to Data Center or SaaS
- **Remediate voice and video applications** on any medium
- Bond multiple links to **increase bandwidth**
- Per-packet switching to **increase uptime of all applications**
- **Simplify deployments** and ongoing support with single GUI
- **Flexible edge deployment options** (Appliance, VEP, Virtual)
- Enjoy the benefits of **Dell Global Hardware Support and Logistics**

SD-WAN value proposition

Solution components

Dell EMC Edge Appliances

- Dell supply chain
- Factory integrated
- Dell Support

VMware Edge Software

- Zero Touch Deployment to reduce opex
- Subscription bandwidth tiers
- Dell/VMware support

VMware Cloud Gateways

- VMware-operated
- Global Network Footprint
- Front door access to SaaS providers
- Links multiple Internet connections to provide more bandwidth and increase uptime

Dell EMC Orchestrator

- VMware-operated, Dell-managed
- Automated network provisioning reduces opex
- Single GUI – no CLI
